PREFACE	ix
ABBREVIATIONS AND GENETIC SYMBOLS	xi
CONTRIBUTORS	xvii
<b>Chapter I.</b> Introduction <i>By Harold P. Rusch</i>	1
I. The Search	1
II. Description of <i>Physarum polycephalum</i>	6
<b>Chapter II.</b> The Nuclear Replication Cycle in <i>Physarum polycephalum</i> <i>By Charles E. Holt</i>	9
I. Introduction	9
II. Chromosomal DNA	11
III. Nucleolar DNA	51
IV. Concluding remarks	62
<b>Chapter III.</b> Transcription in the Myxomycete <i>Physarum polycephalum</i> <i>By Peter W. Melera</i>	64
I. Introduction	64
II. Complexity of the <i>Physarum</i> genome; rDNA	64
III. DNA-dependent RNA polymerase	68
IV. RNA transcripts	73
V. Ribosomal RNA	73
VI. Transfer RNA and 5S RNA	84
VII. Heterogeneous nuclear RNA and mRNA	86
VIII. Transcription during the mitotic cycle	90
IX. Concluding remarks	96

CONTENTS

<b>Chapter IV.</b> The Nuclear Proteins of <i>Physarum polycephalum</i> : A Comparative View By B. W. Walker, M. E. Christensen, A. L. Beyer, and W. M. LeSturgeon	98
I. Introduction	98
II. <i>Physarum</i> histones and chromatin subunit structure	99
III. <i>Physarum</i> nuclear nonhistone proteins	105
IV. <i>Physarum</i> nucleolus and nucleolus-specific proteins	119
V. Nuclear RNA-binding proteins and mammalian 40S HnRNP particles	122
VI. Concluding remarks	127
<b>Chapter V.</b> The Genetic Approach in the Analysis of the Biology of <i>Physarum polycephalum</i> By Finn B. Haugli, David Cooke, and Peter Sudbery	129
I. Introduction	129
II. Genetic aspects of the <i>Physarum</i> cell nucleus	130
III. Genetic analysis of biological functions in <i>Physarum polycephalum</i>	133
IV. Methods of genetic analysis	147
V. Concluding remarks	155
<b>Chapter VI.</b> Developmental Phases in the Life Cycle of <i>Physarum</i> and Related Myxomycetes By Jessica A. Gorman and Adam S. Wilkins	157
I. Introduction	157
II. Alternate states during the life cycle	158
III. Alternate modes of differentiation: sexual and asexual life cycles	163
IV. The amoebal-plasmodial transition	167

CONTENTS

V. The amoeboid-flagellate transformation	180
VI. Encystment: reversible differentiation to a dormant state	181
VII. Sporulation	192
VIII. Concluding remarks	201
<b>BIBLIOGRAPHY</b>	<b>203</b>
<b>INDEX</b>	<b>245</b>
